The
Journal of
Supercomputing
Volume 6, 1992

The El'brus-3 and MARS-M: Recent Advances in Russian High-Performance Computing ..... *Mikhail N. Dorozhevets and Peter Wolcott* 5

Vector Performance Estimation for CRAY X-MP/Y-MP Supercomputers ..... *Allen R. Hainline, Steven R. Thompson and Lawrence L. Halcomb* 49

Memory Conflict Resolution in Vector Supercomputers ..... *Shlomo Weiss* 71

Parallel Heap: An Optimal Parallel Priority Queue ..... *Narsingh Deo and Sushil Prasad* 87

Ultrahigh-Performance FFTs for the CRAY-2 and CRAY Y-MP Supercomputers ..... *David A. Carlson* 107

A MIMD Implementation of a Parallel Euler Solver for Unstructured Grids ..... *V. Venkatakrishnan, Horst D. Simon and Timothy J. Barth* 117

Parallel Simulation of Electron-Solid Interactions for Electron Microscopy Modeling ..... *S.J. Plimpton, J.R. Michael and A.D. Romig, Jr.* 139

Parallel Superconductor Code on the iPSC/860 ..... *G.A. Geist, B. Ginatempo, W.A. Shelton and G.M. Stocks* 153

A Parallel Monte Carlo Search Algorithm for the Conformational Analysis of Polypeptides ..... *Daniel R. Ripoll and Stephen J. Thomas* 163

Lattice Quantum Hadrodynamics on a CRAY Y-MP ..... *Joachim Frank and Siegfried Knecht* 195

Performance and Performance Modeling of a Parallel Algorithm for Solving the Neutron Transport Equation ..... *Yousry Y. Azmy* 211

Sparse QR Factorization on a Massively Parallel Computer ..... *Steven G. Kratzer* 237

Mapping Finite Element Graphs on Hypercubes ..... *Yeh-Ching Chung and Sanjay Ranka* 257

An Introduction to Compilation Issues for Parallel Machines ..... *Maya Gokhale and William Carlson* 283

Performance of Parallel Cholesky Factorization Algorithms Using BLAS ..... *Glenn R. Luecke, Jae Heon Yun and Philip W. Smith* 315
